DETAILED ACTION

Information Disclosure Statement

1. The 1449 has been reviewed and signed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

3. Claims 7, 9, 12, and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Mok (6343975).

Mok teach a comprising the steps of supplying a plurality of chips and cleaning (stations 4 also using a cleaning liquid and stations 5 cleans by fine polishing or buffing) outer surfaces of the chip.

4. Claim 7 is rejected under 35 U.S.C. 102(a) as being anticipated by Admitted Prior Art (APA).

APA (figure 7) teaches a method as claimed in claim 7.

Claim Rejections - 35 USC § 103

Art Unit: 3723

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 10 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mok (6343975) in view of White (6241583).

a. Mok is discussed above.

b. Mok does not teach a with an abrasive belt and driving means.

c. White teaches a method of having an abrasive belt (fig.3a-c) with a drive means which allows the combination of rotation grinders and belt grinders to used on a platen.

d. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the Mok device by providing an abrasive belt and driving means as taught by White which allows the combination of rotation grinders and belt grinders to used on a platen.

Allowable Subject Matter

7. Claims 8, 11, 13-14, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3723

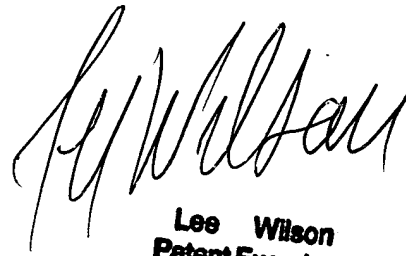

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Krusell et al, Harju, and Nakagawa et al disclose a device.
